

# AHSAN TECHNOLOGIES LTD.

Making Technology work for you

START NOW

**WHO WE ARE**  
A Story About Us

Ahsan Technologies Ltd. is a national IT company founded in 2020 providing technical services to clients in Bangladesh. We have applied skills in creating large ERP systems, web enabled services in e-commerce as well as integrated solutions across a broad range of industries. Ahsan Technologies Ltd. boasts a couple of dedicated employees, including engineers, business analysts and designers, working with true passion and professional attitude.

 Mission

As a startup with multiple talented employees, we are a confident and trusted partner who can help you to create software based solutions or materialize your digital product idea. We work with you to build solutions that transform lives and products that delight..

 Vision

Reliability, scalability and security are not mere buzzwords to us. These qualities can not be achieved by using a certain technology, adding a library or using a given vendor. It needs the right training by the right persons, experience of making mistakes and learning from them and working together with the right motivation.

 Passion

Quality in software is not just a matter of following a coding style and having 100% test coverage. Building quality software requires quality people. People who know what to test and what not to test; people who have honed the skill of analyzing a problem and coming up with a solution step by step, in iterations, until they have the best solution.

**WHO WE ARE**

## Meet Our Talented Team

“We design and develop services for customers of all sizes, specializing in creating stylish, modern websites and online stores.”

— Daniel Walrus .

**WHAT WE DO**  
Our Services

**SERVICE 01**  
Web Development

Get an eye-catching website that works smoothly across devices. We develop trendy, eye-catching websites that can scale along with your business. Our expert team of web designers, developers, and UX/UI experts leverages the latest trends and technologies and industry best practices to create a final product that's visually appealing, user-friendly, and optimized for SEO, digital marketing, and conversion.

**SERVICE 02**  
Mobile Application Development

Get software tailor-made to your business needs. We can create bespoke software for you that fits all your unique specs and business needs. Our mobile development team works with you every step of the way to deliver a flawless software on time and on a budget that works for you.

**SERVICE 03**  
Digital Marketing

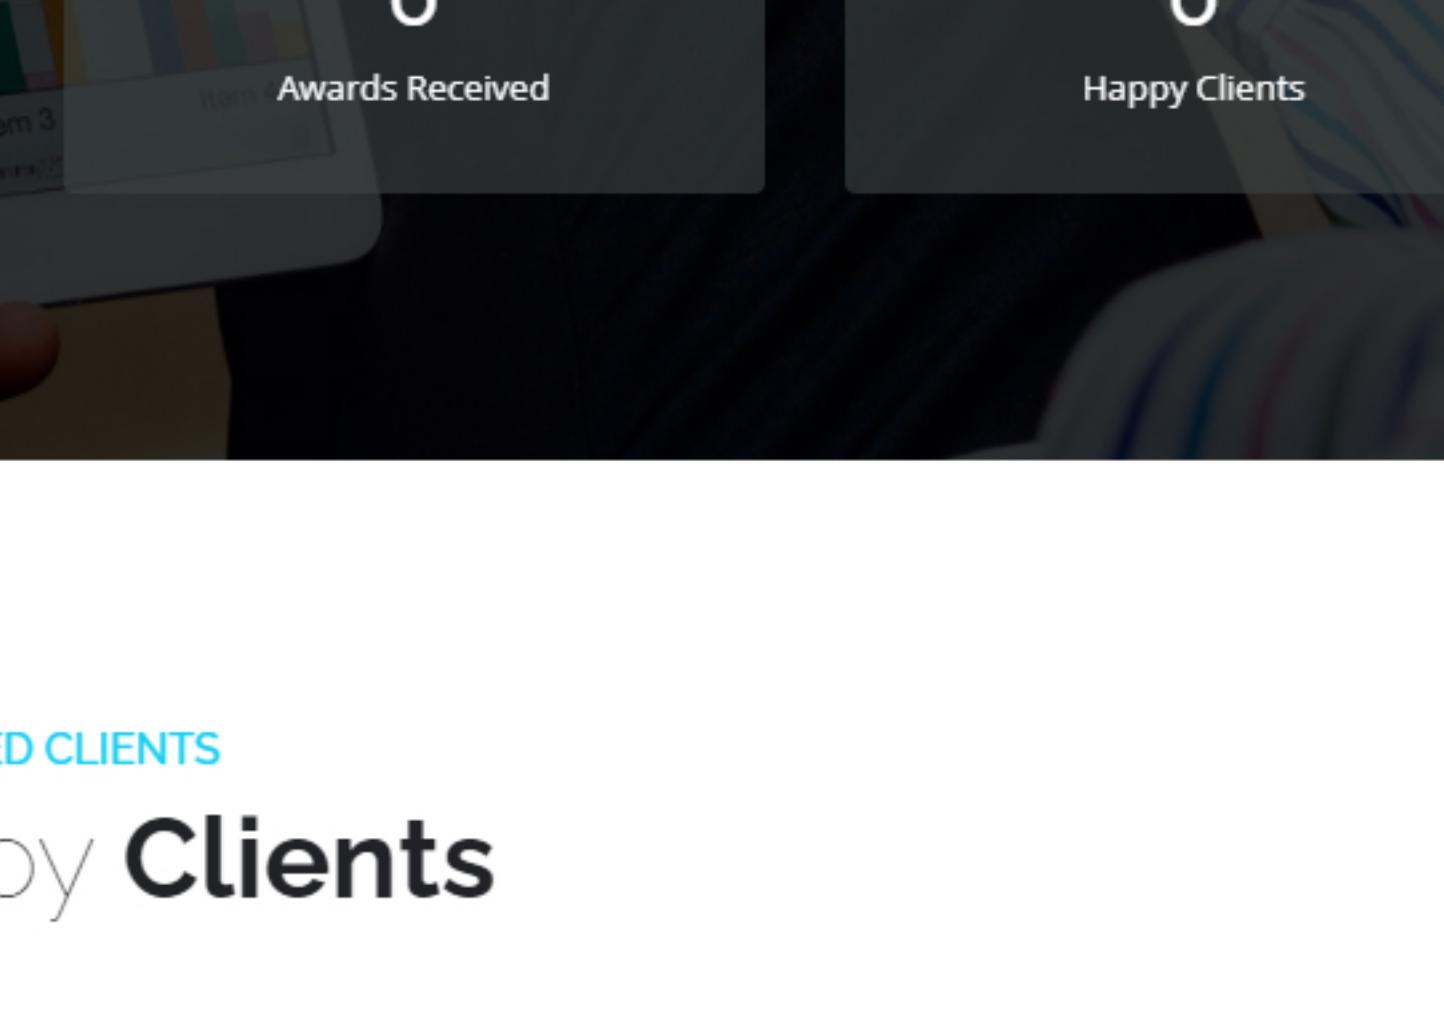

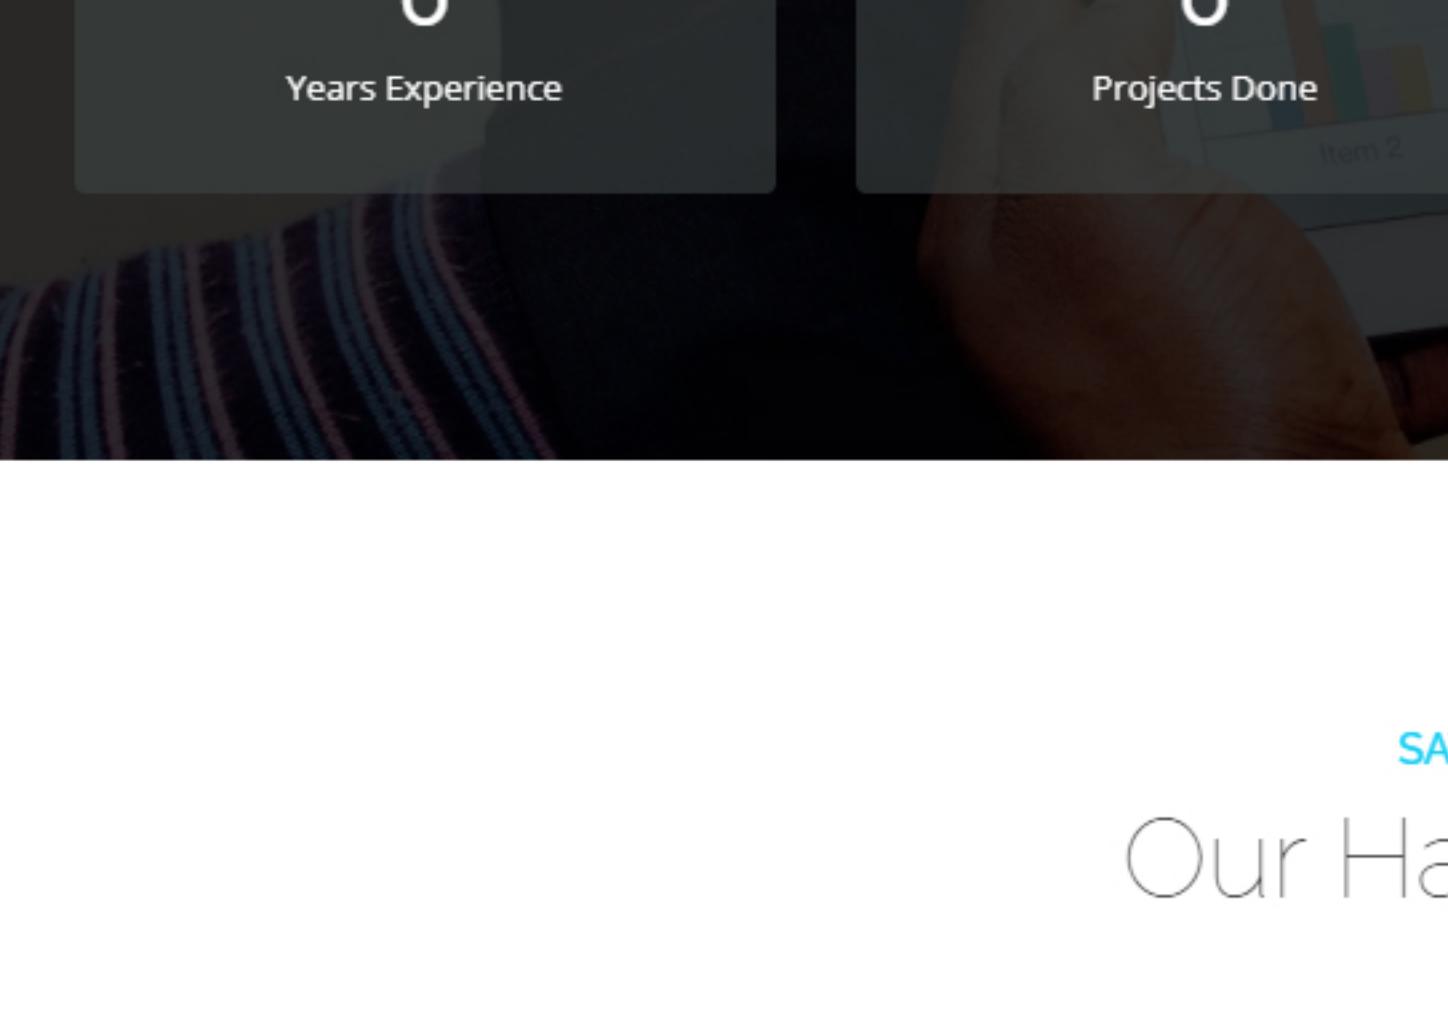

Expand your digital footprint and grow your business. We offer a range of digital marketing services, including industry best practices to create solutions that best fit your business needs. From SEO to social media and everything in between, our solutions offer the perfect blend to drive your results and revenue, increasing your brand's visibility and growth.
